ISI ATLAS OF SCIENCE:  
BIOCHEMISTRY AND MOLECULAR BIOLOGY, 1979/80

A new research and teaching aid that identifies and describes more than 100 highly active life sciences research areas primarily derived from biochemistry and molecular biology is now available from the Institute for Scientific Information.® Called the *ISI Atlas of Science™: Biochemistry and Molecular Biology, 1978/80*, it provides a quick and easy introduction to the important subfields, or "research fronts," which comprise the cutting edge of biochemical research.

The *ISI Atlas of Science: Biochemistry and Molecular Biology, 1979/80* costs \$45.00 to individuals, and \$90.00 to institutions. To qualify for the individual rate, one must pay with a personal check or through the use of a personal VISA or MasterCard account. For further information, please contact Marketing Services, Institute for Scientific Information, 3501 Market Street, University City Science Center, Philadelphia, PA, 19104.

REQUEST FOR EXCHANGE OF SPECIMENS

Aldon I. B. Spencer is interested in building a comprehensive collection of Coleoptera from the United States. He welcomes correspondence with other FES members and is particularly interested in exchanging specimens. His address: 20 West Virginia Avenue, West Chester, PA 19380.

---

CORRECTION

Dakin, M. E., Jr., and D. L. Felder. 1981. A record of the mayfly *Dolania americana* in Louisiana (Ephemeroptera: Behningiidae). *Florida Ent.* 64(3): 454-5.

On line 2, correct "Loudon (1975. M. S. Thesis, Louisiana State University" to Louton (1975. etc. .)." The full name of the author on this unpublished M. S. thesis is Jerry A. Louton. The authors regret any confusion that this oversight may have caused.
