

Correction to Notes on Some Aquatic Insects of the Brandywine Creek Drainage, Chester County, Pennsylvania

By JOHN W. H. REHN, Professor of Biology, Marlboro College;
Research Associate, Academy of Natural Sciences
of Philadelphia

Since the appearance of the basic report ¹ and the supplement ² I have been informed that specialists have examined some of the material and have corrected certain determinations. It is the purpose of this note to record these changes.

The determinations originally given are placed first and are followed by the revised one.

ODONATA ³

Gomphus villosipes = *Gomphus spicatus*.

EPHEMEROPTERA ⁴

Stenonema annexum, F = *Stenonema rubromaculatum* and several *Stenonema pulchellum* group.

Stenomema candidum = *Stenonema pulchellum* group and *Stenonema interpunctatum* group, near *carolina*.

Stenonema ithaca = *Stenonema rubromaculatum*.

Stenonema possibly *ithaca* = *Stenonema* possibly *rubromaculatum*.

Stenonema ohioense A1 = *Stenonema* possibly *carolina*.

Baetidae = *Ephemerella deficiens*.

Baetis sp. = *Baetis* near *pluto*.

Pseudocloeon cingulatum = *Pseudocloeon* sp. (3 or 4 species probably represented).

¹ Ent. News, LXI, pp. 171-177 (1950).

² Ent. News, LXI, p. 203 (1950).

³ Determined by Professor P. P. Calvert.

⁴ Determined by Professor J. R. Traver.

TRICHOPTERA ⁵

Neuroclipsis sp. A1 = *Polycentropus* sp.

These changes slightly increase the number of forms found at station A, and add one to the total at station F. However, the conclusions originally presented still appear to be warranted.

⁵ Determined by Professor H. H. Ross.
